Smart Temperature Monitoring Flawless HACCP Compliance

Total Control | Proven ROI
Total Compliance | Instant Protection

The Mobile App dedicated to your HACCP Procedures

Supervision and management of temperature control operations.

- On receipt of goods
- During storage
- During cooking, hot holding, cold holding and cooling

Key Features:

Automated Task & Deadline Tracking

Real-Time Compliance Checklists

Smart Goods-In Inspection

- Instant photo capture & damaged goods reporting.
- Proactive Expiry Date Tracking

Visual Temperature Feedback (Green/Red)

Precision Bluetooth Probes

Why choose MyFoodCheck?

Maximize Your Bottom Line: Stop wasting labor on manual logs. Our automated readings and validations cut costs and save hours of staff time every week.

Bulletproof Reliability: Eliminate the risk of human error. Experience total peace of mind with 100% accurate, automated data recording you can stand behind.

Audit-Ready Compliance, Guaranteed: Navigate HACCP and DFS inspections with confidence. Our rigorous monitoring ensures you stay fully compliant with zero effort.

Built for the Modern Kitchen: No training? No problem. Our intuitive app is so simple that any team member can master it in seconds, keeping your operations seamless.

Instant-Read Temperature Indicators

Smart App Connectivity: Your Data, Wire-Free

Needle Thermometer

For Core temperature checks

Infrared Thermometer

For contactless temperature checks

Dishwasher recorder

Check rinse water temperature for effective sanitization

New Generation of Connected Sensors

Hospitality | Fast Food & QSR | Retail | Convenience Store | Catering

Effortless Food Safety.

Experience the next generation of food safety. Our state-of-the-art connected sensors provide unmatched accuracy, ensuring your inventory is protected 24/7. MyFoodCheck puts your HACCP compliance on autopilot, eliminating manual logs and letting you focus on what matters most: your customers.

Make your life easier!

- Quick and easy installation: Deploy your solution at a glance, no special technical skills required
- Intuitive operation: manage your temperature data with ease thanks to a user-friendly platform

Reduce your costs, Optimize your time!

- Save 30 min/day vs. manual checks
- Save around 300 dollars per point of sale and per year on fridge and freezer failures
- Save on your energy bills

Real Time Alarms

According to your schedule:

- Visual and audible
- Calls et text messages
- E-mail

An infinite number of measurement possibilities

- Temperature
- Humidity
- Door opening
- Etc.

Innovating Food Safety

- Exceed regulatory requirements and ensure your customers' safety
- Reduce food safety related risks for your consumers
- Improve and maintain your brand reputation

Efficient and High Performing monitoring of all your equipment

Refrigeration & Storage:

- Fridges, Freezers & Walk-in Coolers
- Large-Scale Warehouses

Service & Display:

- Hot & Cold Holding Cabinets
- Mobile Catering Carts
- Juice & Ice Cream Dispensers

Smart Facility Insights:

- Energy Consumption Tracking: Optimize your utility bills
- Air Quality & CO2 Monitoring: Ensure a safe environment for staff and guests

The Nano SPY and Nova SPY ranges

2.4 GHz High-Speed wireless mini recorders

Nova SPY

3-in-1 Recorder

Air & core product
Temperature
Door Opening detection

Genuine wireless sensors

Visual alerts

Plug & Play

Small & Robust

Highly resistant to shock and vibrations

Eco Design

Life span > 10 ans

Nano SPY

2-en-1 Recorder

Air and Core Temperature
monitoring

The recorder

which measures
and records your data

The SPY LINK

is the communication module
that sends to JRI-MySirius the
data collected and alerts you
in the event of an incident

JRI-MySirius

is the cloud platform that
centralizes and visualizes
your data

The LoRa SPY Temp range

Long range recorders for superstores and big spaces

The recorder

measures and records
your data

The Gateway LoRa

ensures communication with
JRI-MySirius

MyFoodCheck

The connected solution for
monitoring temperature and
physical parameters.

- EN 13 485 Temperature indicators
- Long Range Communication ($\geq 300m$)
- For Air & Product temperature

Smart features for Food Safety

AI-simulated core temperature, because ensuring product preservation is what truly matters, not just equipment operation.

Precise measurements for every food item.

Our data loggers monitor the core temperature of your products with **dynamic algorithms*** specifically designed for your most critical foods, while also monitoring the ambient temperature of your equipment. This ensures you only receive truly relevant alarms.

**Custom algorithms can be created specifically for your products.*

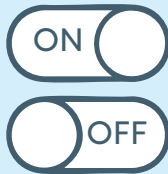

1 sensor

= **AIR TEMPERATURE** + **CORE TEMPERATURE** + **DOOR OPENING**

Optimized Monitoring

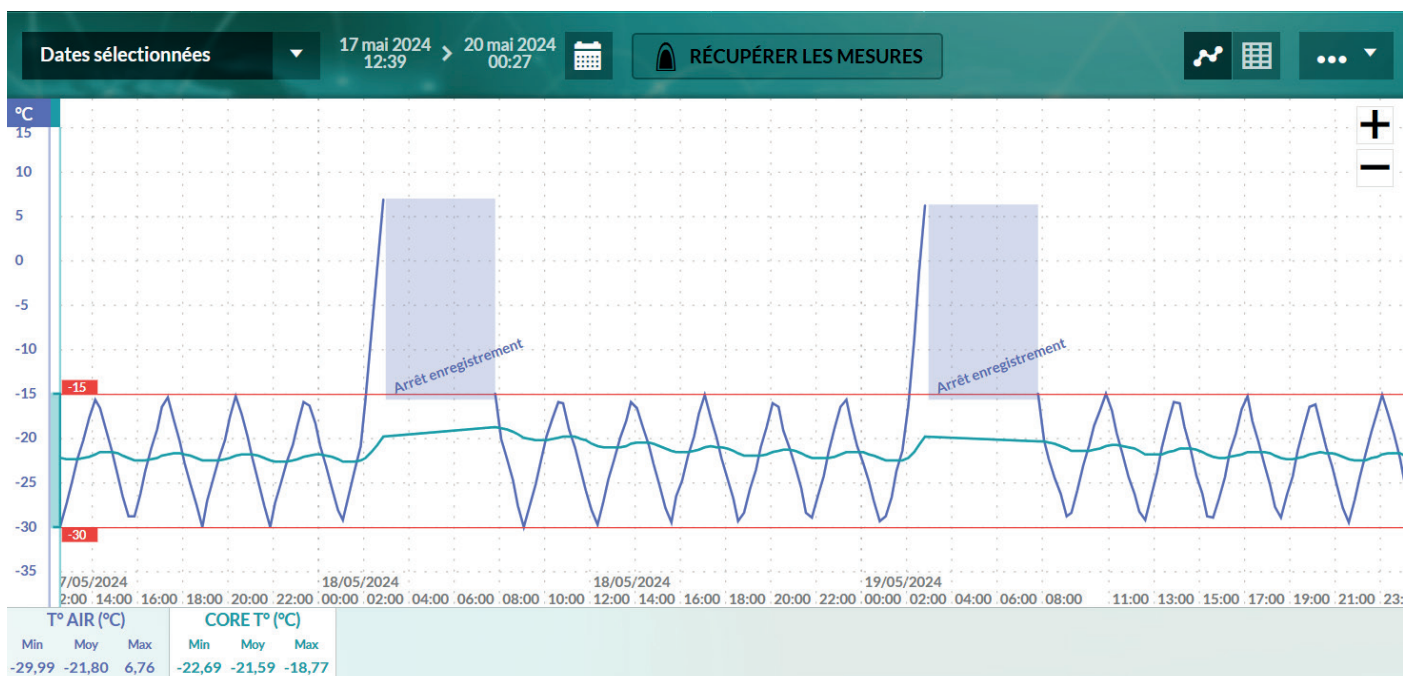

Smart Management of your data

Our recorders only collect essential data: Thanks to their automatic standby function, they do not record useless data during periods of inactivity of your equipment.

Automatic Detection when your equipment is on.

No Data / Alarms if your equipment is switched off during the night

Modular & Customizable Supervision

Measurements are automatically sent to and hosted on the secure JRI-MySirius Cloud Platform for data management on a user-friendly and intuitive interface.

Wide range of alarm management options

Multi-Escalation, snooze, temporary inhibition, etc.

Easy Configuration of sensors

Interface customization

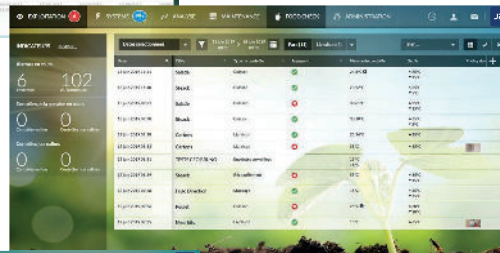

- Various indicators, favorites,
- bookmarks
- Optional Module suited to your needs

Data integration in a third-party software through API

24/7 Access to your data

You have access to your data all the time from wherever you are, nationally and internationally

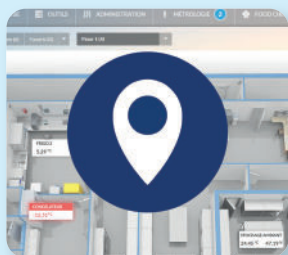

Account Customization

- Unlimited number of users
- Possibility to affect specific rights by profile: administrator, batch managers, supervisors, users, etc.

Centralized Overview of all your locations

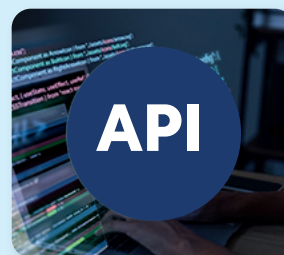

Centralized Data

Map Module

FoodCheck Module

Integration with your other applications

MySiriusAlert Mobile App

Easy and Reliable Metrology

Did you know? Regulations require that you calibrate your sensors regularly to ensure the accuracy of your measurements.

PROBE ROTATION

The exclusive properties of our sensors and probes let you carry out calibration simply by exchanging with a new calibrated probe without interrupting the monitoring of your equipment.

SIMPLICITY

Replace your old probe with a new one

TIME SAVING

No interruption of monitoring

COMPLIANCE

Compliance with annual calibration obligations

Calibration Certificates are automatically uploaded on your application

SELF-CALIBRATION

No need to call in an external company, you place your sensors in the Calib'Box with its standard and start the calibration and adjustment process. JRI generates the certificates and places them on your application for consultation at any time.

Calib'Box

SIMPLICITY

Calibration in just a few clicks

TIME SAVING

No more need to call in an external company

COMPLIANCE

Compliance with annual calibration obligations

Calibration Certificates are automatically uploaded on your application

They trust us!
